Every resource at the command of the National Americanization Committee of the veterans of Foreign Wars will be used in a nation-wide endeavor to teach school children the history of the United States and the part of the American soldier in the world war.

chairman of the committee, in a recent interview. He added, "The committee is fortunate in having the assistance of a number of famous publicists who believe it is high time that this living propaganda be taken from the school books of America. There will be formed a committee of 500, the members of which will represent every state in the Union and this committee will collect data which will be turned over to the national executive body.
